## **In Brief – Announcements in Manufacturing Investment in 2010 Top \$566 Million**

### **Manufacturing Sector**

Data collected by the Oklahoma Department of Commerce shows investment announced by new and expanding manufacturers and processors in 2010 totaled over \$566 million. Within the next few years, over 5,300 new jobs will be created by 15 new and 31 expanding manufacturing firms.

Major job announcements over the year were made by Baker Hughes, Claremore; The Boeing Company, Midwest City; and Enerflow Industries, Broken Arrow.

In 2010, the largest number of announcements was in the area of Machinery Manufacturing. Total investment from these 12 companies was over \$131 million. A few of the largest announcements were: Baker Hughes, Claremore; Enerflow, Broken Arrow; Eagle Claw, Muskogee and Flanders Corp., Ardmore.

The next largest number of firms announced was in Fabricated Metal Manufacturing, with 10 companies announcing over \$18 million in investment. Some of these companies were Mertz, Ponca City Total Energy Fabrication, Blackwell; Logan & Company, Bartlesville; and Avery Barron Industries, Tulsa.

The third largest number of firms with 5 announcements was in Food Manufacturing. Those firms will invest over \$64 million in the state. The larger announcements were Dorada Poultry, Ponca City; Tyson Foods, Broken Bow; and Schwan Food Company, Stilwell.

In examining geographic disbursement during 2010, there was at least one manufacturing announcement in 25 of the 77 Oklahoma counties, or 33% of counties.

### **Service Sector**

In the service sector, 19 new firms and 17 expanding firms announced nearly \$415 million in investments in 2010. During the next few years, these service providers plan to increase employment by over 3,800 new jobs.

Major announcements were made by Affiliated Computer Services, Oklahoma City; U.S. Cellular, Tulsa; and Diagnostic Laboratory of OK, Oklahoma City.

### **Fourth Quarter**

Looking at only the fourth quarter of 2010, 15 expanding companies and 9 new businesses were announced with planned investment of nearly \$348 million in the Oklahoma economy. Over the next few years, over 3,014 jobs will be created from those announcements.

Major announcements in the fourth quarter were made by Baker Hughes, Claremore; Convergys, Moore; and MDV Nash Finch, Oklahoma City.

## TECHNICAL NOTES

### INTERVAL:

The *Announced New and Expanded Manufacturers and Services Report* is produced by Policy, Research and Economic Analysis of the Oklahoma Department of Commerce. Data is compiled on a calendar year basis. Four reports are produced per year: one for each of the first three-quarters and a final report, which combines all four quarters.

### INCLUSION:

This report includes new and expanding manufacturers and selected services. Only companies making **public announcements** of their projects are included in this report.

### SOURCE:

Information for this report is provided by a variety of sources, including internal Department of Commerce reports, a statewide clipping service and local economic development agencies. Contributions are always welcome. Please contact the Research and Economic Analysis for further information.

### CATEGORY NOTES:

The employment portion of the report now lists just one category: Jobs Within 3 Years. Companies announce the number of jobs which they intend to fill immediately or over the next several years, up to three.

Previously, service announcements were restricted to firms hiring over 100 employees or investing over \$1 million. This restriction was removed beginning in 1996. We will continue to print only service announcements from selected business-related services.

Investment figures for both manufacturers and services are gathered and pooled for the report. Individual company information is not made public. Also note that many companies do not choose to release the investment dollars, so our total figures may be understated. Or, they may be overstated when companies do not complete the new or expanded project.

### RELIABILITY:

Every effort is made to ensure that listings in this report are as accurate as possible. Announced projects are in various states of completion at the time announcements are made in this report. Occasionally, companies will decide to amend or abandon their announced plans, depending upon economic conditions.

In the past, Commerce has performed annual surveys to verify the performance of the new and expanding manufacturers listed in the report. On average, 50% of the jobs announced are actually hired, while 70% of the square footage planned was bought, built, or leased.

### AVAILABILITY:

Copies of quarterly and annual editions of this report are available at: <http://www.okcommerce.gov/Data-And-Research/Downloads/Announced-New-And-Expanded-Manufacturers> .
