

EAST CENTRAL WIA ECONOMIC PROFILE

April 2011

The East Central Workforce Investment Area (East Central WIA) is comprised of five counties: Hughes, Lincoln, Okfuskee, Pottawatomie and Seminole counties. This profile will provide an overview of population, employment, average wage, and commuting patterns specific to the East Central WIA.

POPULATION

The accompanying graph and pie charts relate county and regional population information from the last decennial census in 2000 to 2009. According to Census Bureau estimates the region's population reached 151,512 in 2009, growing by an estimated +3,049 over

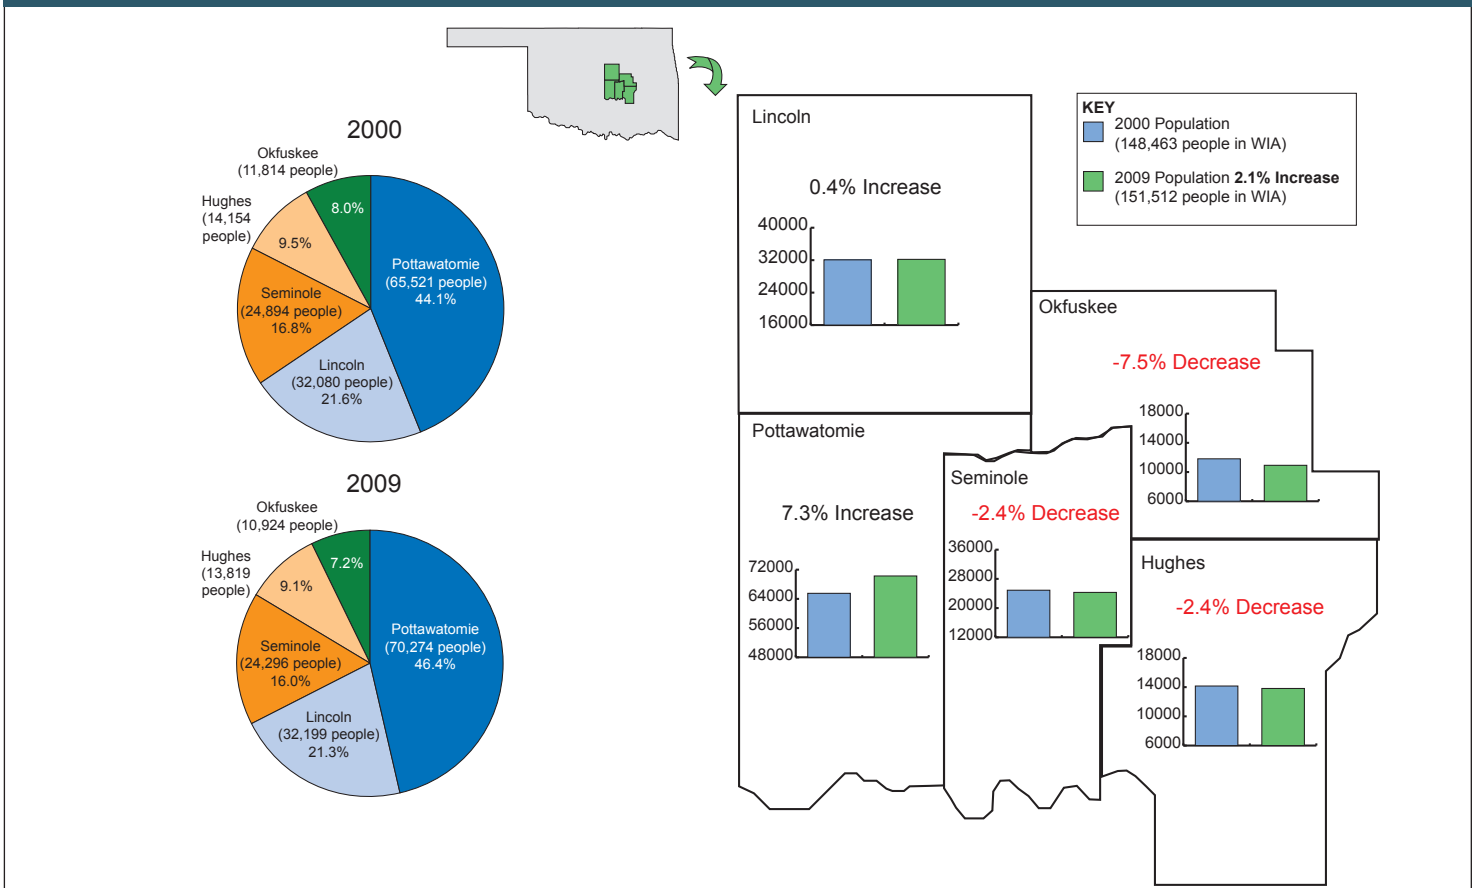

the previous decade. The resulting growth rate was +2.1%, which is below the state's average growth rate of +6.9% for the same time period.

The comparatively low rate of population growth was not uniform. Pottawatomie County, the largest county in the region, had a +7.3% growth rate between 2000 and 2009. That county's net population growth of +4,753 exceeded the region's overall growth by more than +1,700 people. Lincoln County was the only other county showing positive growth over the decade, adding +119 people for a growth rate of

+0.4%. The other three counties in the East Central WIA (Hughes, Seminole and Okfuskee) all experienced net population declines between 2000 and 2009.

Population declines experienced in the region were mostly concentrated in the years 2000-2005. During that time period, population growth of just over +2,000 people in Pottawatomie County was almost completely offset by population declines in the other four counties. Since 2005, only Okfuskee County has shown a net population decrease.

EAST CENTRAL WIA POPULATION & DISTRIBUTION: 2000 - 2009

Source: U.S. Census Bureau, Population Estimates Division <http://www.census.gov/popest/counties/tables/CO-EST2009-01-40.xls>

SECTOR EMPLOYMENT

The accompanying table relates sector employment totals and employment changes in the East Central WIA between 2005 and 2010 and projects employment for 2015. Unlike employment figures reported by the US Bureau of Labor Statistics, EMSI job estimates include data for non-employer establishments (partnerships and sole proprietorships), military staffing and agriculture employment.

The East Central WIA added +4,570 jobs between 2005 and 2010, growing by +7.1% over the entire time period. Both collectively and individually, job growth for all five counties exceeded the state's rate of job growth of +6.0% between 2005 and 2010, with the lone exception being Okfuskee County. In Okfuskee County the net rate of growth was +1.5%, despite that county's net population decline of -3.0% between 2005 and 2009.

EAST CENTRAL WIA JOB DISTRIBUTION

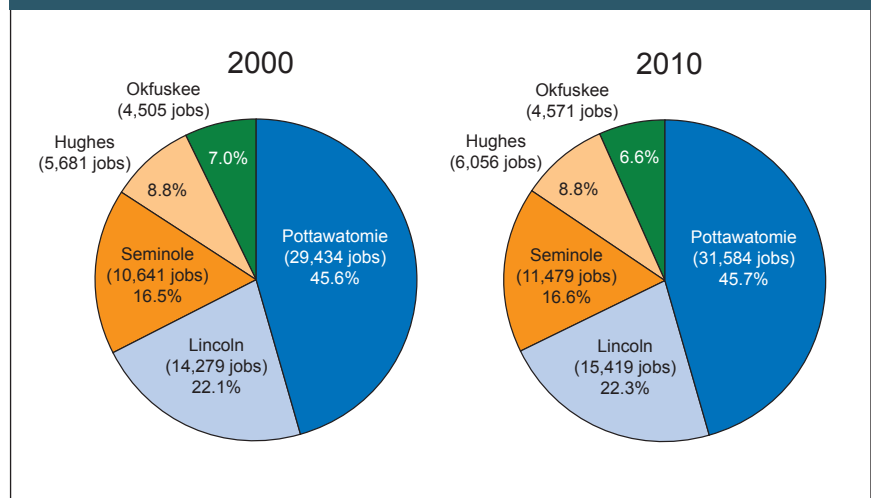

NAICS Code	Description	2005 Jobs	2010 Jobs	2005-2010 growth	2005-2010 growth %

Source: EMSI Complete Employment - 4th Quarter 2010 www.economicmodeling.com

Between 2005 and 2010 Pottawatomie County had the largest numeric job increase. Pottawatomie County added +2,150 jobs and achieved a growth rate of +7.3%. However, Lincoln and Seminole counties both had larger percentage growth rates during the period, growing by +8.0% and +7.9% respectively.

In 2010, the average worker in the region earned an estimated \$35,096 per year, including benefits. Workers in the management of companies and enterprises industry had the highest earnings at \$131,939 per worker on average but there were fewer than 100 such workers located within the region. The second highest average wage rate existed for the more than 5,300 workers in the mining, quarrying and oil and gas extraction industry.

EAST CENTRAL WIA JOB DISTRIBUTION: 2005 - 2010

Source: EMSI Complete Employment - 4th Quarter 2010 www.economicmodeling.com

Wages and benefits for those workers averaged \$75,963 in 2010. The roughly 500 workers in the region's arts, entertainment and recreation industry had the lowest earnings at \$10,323 per worker.

Between 2005 and 2010, ten of the twenty main industry groupings showed net growth in employment. The largest increase occurred in the mining, quarrying and oil and gas extraction industry where +2,493 jobs were added. That represented an +87.0% job gain within that industry and represented +54.6% of the WIA's overall net job growth between 2005 and 2010.

Collectively, jobs with federal, state, local and tribal governments represented the region's second largest numeric increase between 2005 and 2010 and added +1,512 jobs for a +13.9% increase. Meanwhile, ten regional industries showed net job losses in the latter part of the past decade. Of those ten, the manufacturing and retail trade industries showed the largest numeric decline. The arts, recreation and entertainment industry showed the largest decline as a percentage, dropping one job in four.

Job growth in approximately one third of the twenty primary industry groups is expected to remain flat between 2010 and 2015 while the other two thirds should see continued or newly developing improvement. No industries are forecast to show significant job declines.

The most significant growth is expected in the mining and government industries as those two industries are forecast to account for four out of ten new jobs between 2010 and 2015. Six of the twenty industries are forecast to have double digit growth rates, led by the information industry (+27.7% growth rate) and the extraction industry (+24.3% growth rate). Over the entire time span, the region is expected to add over +4,900 jobs with a growth rate of +7.1%.

OCCUPATIONAL EMPLOYMENT

The region's net number of jobs grew by +7.1% between 2005 and 2010 with the biggest numeric gains found among management occupations (+1,443) and construction and extraction jobs (+546). The overall job growth rate was higher than growth experienced at the state level (+6.0%) and well above national figures (+0.2%) for the given time period.

EAST CENTRAL WIA JOB DISTRIBUTION

Source: EMSI Complete Employment - 4th Quarter 2010 www.economicmodeling.com

Within the East Central WIA, only four of the 23 main occupational categories experienced net job losses between 2005 and 2010. Production jobs declined by -227 (or -5.5%), transportation jobs declined by -220 (-5.1%), sales jobs declined -109 (-1.5%) and arts, design, entertainment, sports and media jobs declined by -113 (-9.1%).

Looking forward to 2015, all occupational categories are expected to grow, with the exception of military jobs where growth is expected to remain essentially flat. In total, the region is expected to add +4,918 jobs for a growth rate of +7.1% between 2010 and 2015.

The largest numeric growth is expected in the occupational categories of management (+1,551), administrative support (+1,289), construction (+1,130) and sales (+1,088). The largest percentage growth rates are expected in the more scientific related occupational fields of life, physical and social sciences (+19.3%) and architecture and engineering (+16.5%).

While the above data looks at net job growth, additional job openings will take place as employees retire or change jobs. As a whole the East

Central WIA is expected to average 2,629 job openings each year between 2010 and 2015 and most are forecast to occur in the management, sales, office administration and extraction occupations.

Life, physical and social science occupations have the highest average hourly wage in the region, averaging \$27.90 per hour and well above the regional average hourly wage of \$15.06. Nearly all occupations in the East Central WIA show an average hourly wage below the comparable average wage reported at the state level, with the exception of farming, fishing and forestry occupations (FFF). Yet the difference there is minor as, on average, FFF workers in the East Central WIA only surpass their statewide counterparts by \$0.03.

Occupations in the East Central WIA are more specifically detailed in the following text, focusing on three categories; largest occupation, highest paying occupations, and fastest growing occupations.

EAST CENTRAL WIA EMPLOYMENT					
SOC Code	Description	2005 Jobs	2010 Jobs	2015 Jobs	2010 Avg Hourly Wage
11-0000	Management occupations	10,980	12,423	13,310	\$17.81
13-0000	Business and financial operations occupations	1,691	2,057	2,346	\$17.05
15-0000	Computer and mathematical science occupations	437	531	600	\$20.45

* 40 hrs per week & 52 weeks per year to annualize hourly earnings

LARGEST OCCUPATIONS

Within the East Central WIA, the top ten most common occupations represent one out of every four jobs present in 2010. Farmers and ranchers, the most common occupation within the region, account for nearly one job in ten – a fact that might seem confusing by the section above which stated there were only 671 farming, fishing and forestry (FFF) occupations in the East Central WIA in 2010. This confusion stems from how the Standard Occupational Code (SOC) categorizes various jobs by function.

The SOC system shows the East Central WIA had 5,577 farmers and ranchers and 834 farm and ranch managers in 2010, all FFF related positions but listed under the SOC's separate management category. Combined, the 671 reported FFF occupations plus

the 5,577 farmers and ranchers and the 834 farm and ranch managers total over 7,000 workers – more in line with the nearly 7,400 workers reported in the NAICS industry category of agriculture, forestry, fishing and hunting. The remaining difference is accounted for by other occupational categories scattered throughout the SOC system.

While the above mentioned farming and ranching occupations dominate employment in the region, other top occupations include truck drivers, retail clerks, cashiers, food preparation workers and office workers. While top wage earners in some of these occupations can earn more than twice the regional average hourly wage, most job holders in these occupations earn relatively low wages.

FASTEST GROWING FUTURE OCCUPATIONS

One third of all new jobs in the East Central WIA projected between 2010 and 2015 will be among the top ten occupations listed in the adjacent table. Collectively, the top ten occupations account for 1,605 projected new jobs, measured against the net total gain of just over 4,900 jobs forecast to be added in the East Central WIA during that time span.

Management, home and health assistance, truck drivers and office support occupations lead the region's occupation growth estimates between 2010 and 2015. Lincoln and Pottawatomie counties are forecast to experience the most significant employment growth, accounting for two thirds of the region's expected employment growth.

EAST CENTRAL WIA LARGEST OCCUPATIONS (SORTED BY 2010 JOB COUNTS)

SOC Code	Description	2005 Jobs	2010 Jobs	2015 Jobs
11-9012	Farmers and ranchers	5,595	5,577	5,573
11-9199	Managers, all other	1,085	1,899	2,330
41-2031	Retail salespersons	1,480	1,609	1,767
43-3031	Bookkeeping, accounting, and auditing clerks	1,216	1,341	1,440
53-3032	Truck drivers, heavy and tractor-trailer	1,403	1,304	1,398
41-2011	Cashiers, except gaming	1,277	1,247	1,210
41-1011	First-line supervisors/managers of retail sales workers	1,131	1,097	1,101
35-3021	Combined food preparation and serving workers, including fast food	868	1,011	1,128
43-9061	Office clerks, general	848	877	927
11-1021	General and operations managers	784	871	928

11-9141	Property, real estate, and community association managers	522	864	1,067
43-6014	Secretaries, except legal, medical, and executive	817	835	849
11-9011	Farm, ranch, and other agricultural managers	827	834	839
31-1012	Nursing aides, orderlies, and attendants	816	826	781

Source: EMSI Complete Employment - 4th Quarter 2010 www.economicmodeling.com

While managers are the fastest growing occupation in all but Okfuskee County, there are some slight differences in the order for fastest growing occupations across the region. Agriculture leads expected job growth in Okfuskee County, where farmers and ranchers are the fastest growing occupation, with farm managers and miscellaneous agricultural workers also making the top ten. In Hughes County, correctional officers and prison guards make the top ten list due to the presence of Davis Correctional Facility in Holdenville. In Seminole County, oil and gas roustabouts make the top ten list. Home health care workers and personal care aides make the top ten list in all five counties.

EAST CENTRAL FASTEST GROWING FUTURE OCCUPATIONS					
SOC Code	Description	2010 Jobs	2015 Jobs	2010-2015 Growth	2010-2015 Growth %
11-9199	Managers, all other	1,899	2,330	431	22.7%
11-9141	Property, real estate, and community association managers	864	1,067	203	23.5%
47-1011	First-line supervisors/managers of construction trades and extraction workers	869	1,033	164	18.9%
41-2031	Retail salespersons	1,609	1,767	158	9.8%
39-9021	Personal and home care aides	565	702	137	24.2%
35-3021	Combined food preparation and serving workers, including fast food	1,011	1,128	117	11.6%
31-1011	Home health aides	507	618	111	21.9%
43-3031	Bookkeeping, accounting, and auditing clerks	1,341	1,440	99	7.4%
53-3032	Truck drivers, heavy and tractor-trailer	1,304	1,398	94	7.2%
41-9022	Real estate sales agents	503	594	91	18.1%

Source: EMSI Complete Employment - 4th Quarter 2010 www.economicmodeling.com

Beyond net job gains, job openings are another major consideration. Managers, retail clerks, cashiers and food service workers are expected to have the most significant number of openings, followed by farmers, ranchers and truck drivers.

HIGHEST PAYING OCCUPATIONS

Regionally, nine of the top ten highest paid occupations are either related to medicine or energy, with judges rounding out the list. Physicians and surgeons are the highest paid occupation in the East Central WIA, earning \$56.93 per hour on average. This compares against the East Central WIA's average hourly wage per job of \$14.89. EMSI estimates the 2010 statewide average was \$17.36 and the national average was \$20.20.

EAST CENTRAL WIA HIGHEST PAYING OCCUPATIONS					
SOC Code	Description	2005 Jobs	2010 Jobs	2015 Jobs	2010 Average Hourly Wage
29-1069	Physicians and surgeons	198	190	209	\$56.93
29-1021	Dentists, general	30	42	47	\$51.30
29-1071	Physician assistants	33	36	43	\$43.98
23-1023	Judges, magistrate judges, and magistrates	14	15	15	\$42.95
29-1051	Pharmacists	93	91	99	\$42.29
17-2151	Mining and geological engineers, including mining safety engineers	21	52	67	\$39.91
51-8092	Gas plant operators	41	100	127	\$39.67
47-5099	Extraction workers, all other	36	89	113	\$39.36
19-4041	Geological and petroleum technicians	66	152	193	\$37.72
19-2042	Geoscientists, except hydrologists and geographers	43	86	107	\$37.38
53-7071	Gas compressor and gas pumping station operators	26	62	79	\$36.99

Source: EMSI Complete Employment - 4th Quarter 2010 www.economicmodeling.com

Looking at average hourly wages across all occupations but limiting the geography to each individual county, hourly wages ranged from an average of \$13.66 in Lincoln County to \$16.20 in Seminole County during 2010. In terms of the highest average wage by occupation in each county, energy workers top the list in Hughes County (gas plant operators in that county average \$45.39 per hour) and education administrators (earning \$36.57 on average) top the list in Okfuskee County. Physicians and surgeons top the list in Lincoln, Pottawattamie and Seminole counties, earning \$39.11, \$58.68 and \$56.39 respectively.

COMMUTING PATTERNS

In the graphs below, the first map displays the percentages of a county's employed population that either (1) live and work in the same county, (2) work in the region, but not the same county as they reside, or (3) commute outside the region for employment. Commuting patterns are based on data from the 2000 Census.

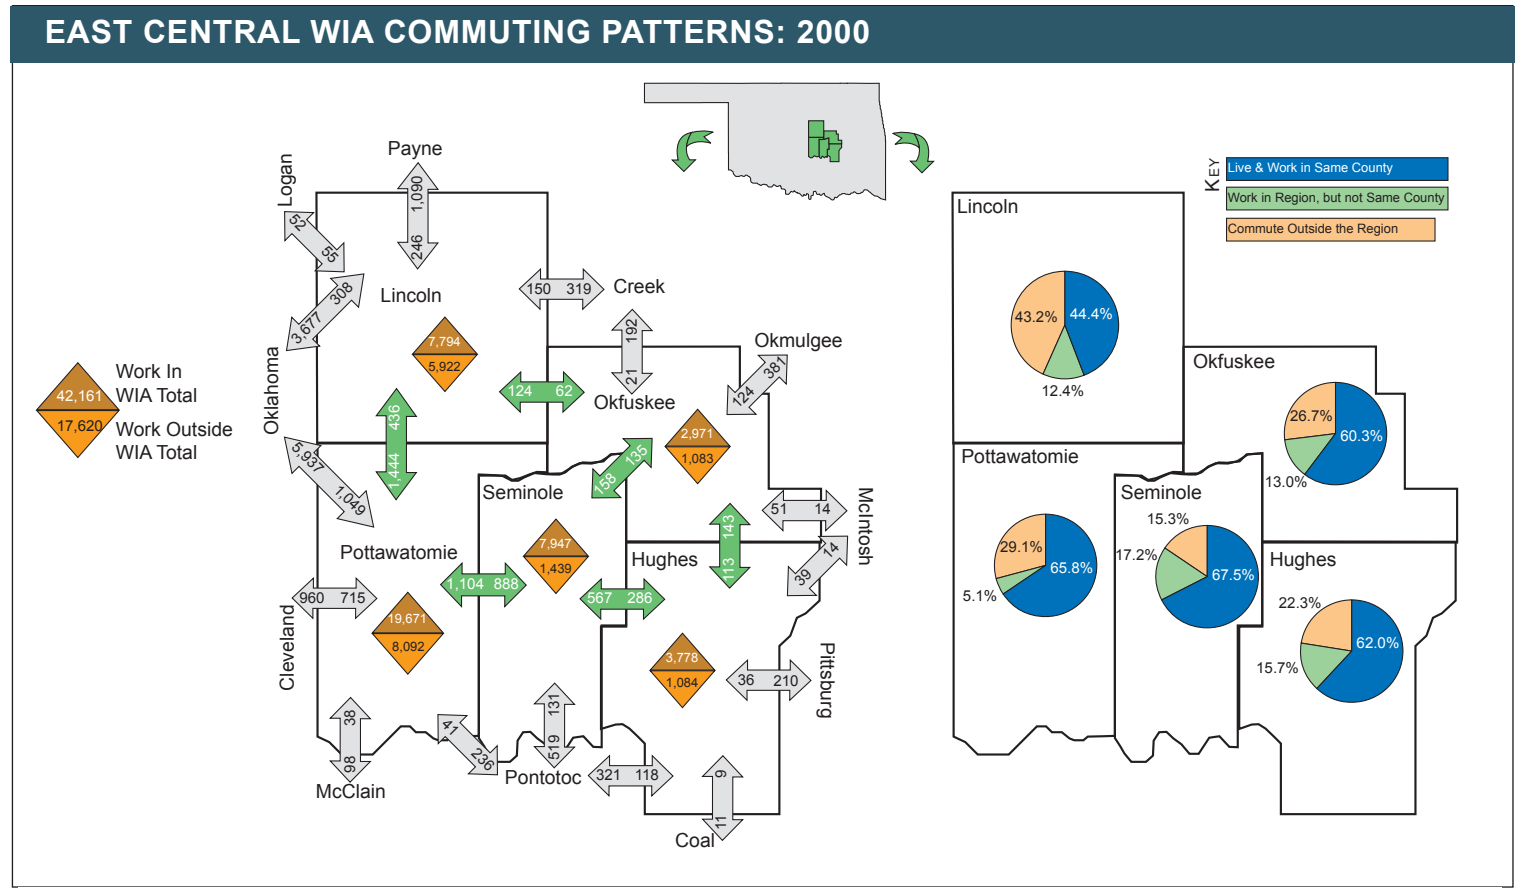

For the most part, workers live in the same county as their place of work, ranging from Lincoln County's low of 44.4% of working residents staying in their county for employment to a high of 67.5% in Seminole County. On average, 70.5% of all working residents of the East Central WIA stay within the WIA for their place of employment.

Lincoln County has the highest percentage of residents commuting outside the WIA for work, at 43.2% of the county's resident working population. Seminole County has the lowest percentage of working residents leaving the WIA, at 15.3%. Approximately one quarter to one third of working residents in Hughes, Okfuskee and Pottawatomie counties leave the WIA for employment – 22.3%, 26.7% and 29.1% respectively.

The map on the left displays the residents of one county who commute to a bordering county within the East Central WIA. This map shows commuting patterns within the region, highlighted in green. The map also shows commuters outside the region that travel to and from non-bordering areas of each county; highlighted in contrast orange. Other areas are shaded in contrast gray to represent non-East Central WIA commuters.

On average, 10.0% of all workers in the region commute from outside of the WIA with some variation from county to county. When looking at the percentage of workers coming from outside the county, Seminole County has the lowest ratio at 5.2%. Lincoln County has the highest ratio at 14.3%.

Pottawatomie and Seminole counties are the only two counties showing a net workforce inflow. Pottawatomie County's daytime population grows by over 1,300 as workers from outside the county travel to work while the net inflow in Seminole County approaches 200 workers.

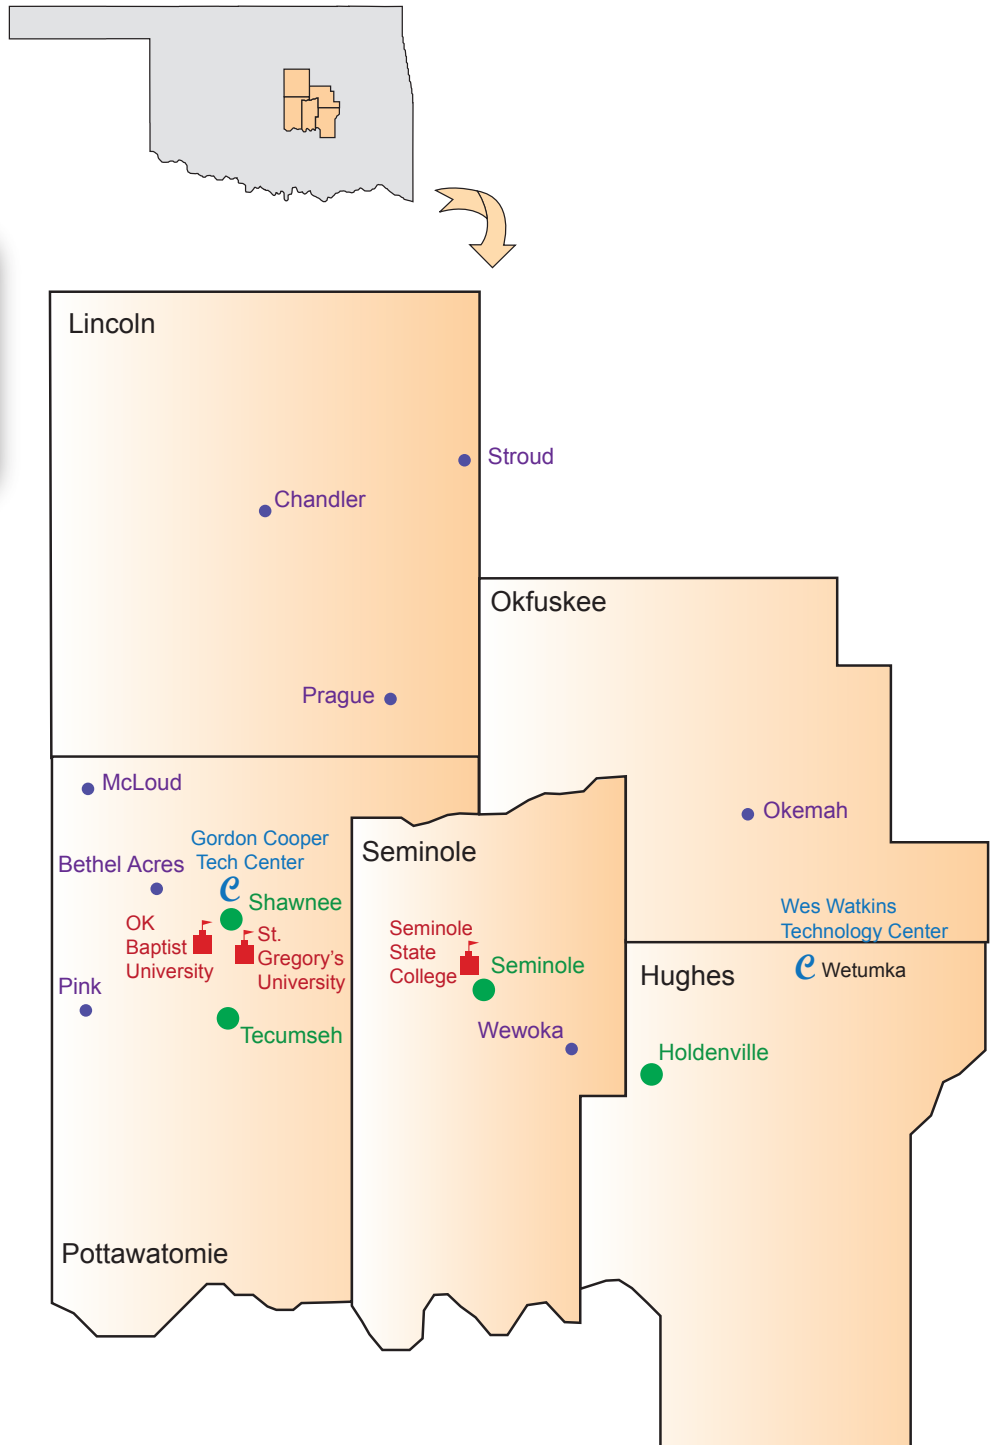

Source: U.S. Census Bureau, 2000 Census of Population & Housing, Summary File 3

Note: Commuting patterns are based on Census 2000 data and may not reflect recent activities such as employment growth. For more detail, including commuting to counties outside the region, please see the 2006 Demographic State of the State report, which may be viewed at www.okcommerce.gov/sos.
