POPULATION GROWTH RATES: 1990 TO 2010

- In 2010, the population in this 14 county region totaled 594,497 people, representing 15.8% of the state's total population
- On average the region's population has grown at an annual 0.9% rate over the last decade
- The region is forecast to experience continued population growth over the next five years
- Between 2000 and 2010, 9 counties in Oklahoma had population growth rates over 15% and 2 of those counties were in this region
- Wagoner and Rogers counties had the 2nd and 5th highest population growth rates in the state during that period, 24.3% and 21.0% respectively

Source: U.S. Census Bureau - 2010 Census

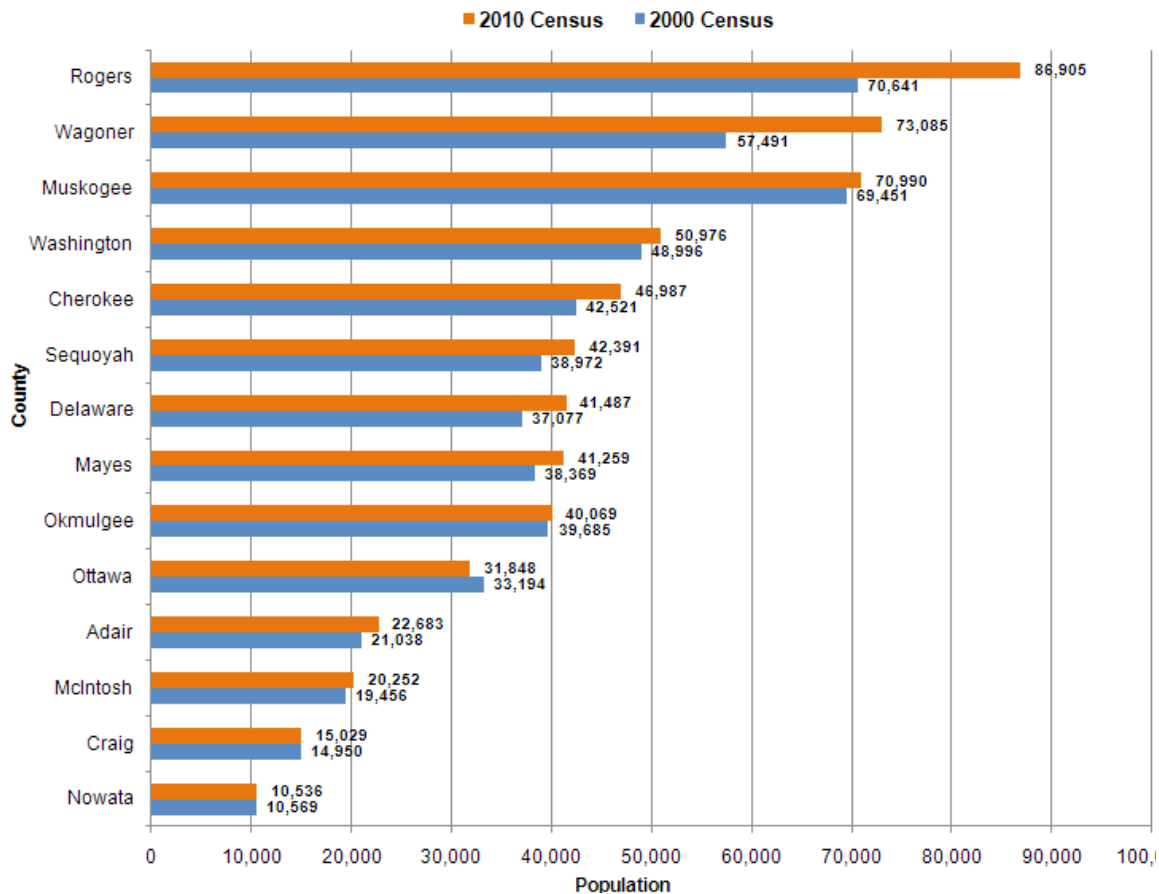

- For more information on county level population growth since 1990, see Appendix 1

Source: US Census Bureau, Population Estimates Division <http://www.census.gov/popest/estimates.html>

- Over the decade between 2000 and 2010, population growth occurred in 12 of the region’s 14 counties, led by increases in Rogers and Wagoner counties
 - Rogers County added 16,264 people
 - Wagoner County added 15,594 people
 - That represented 61.2% of the region’s total population growth this past decade

Population By County

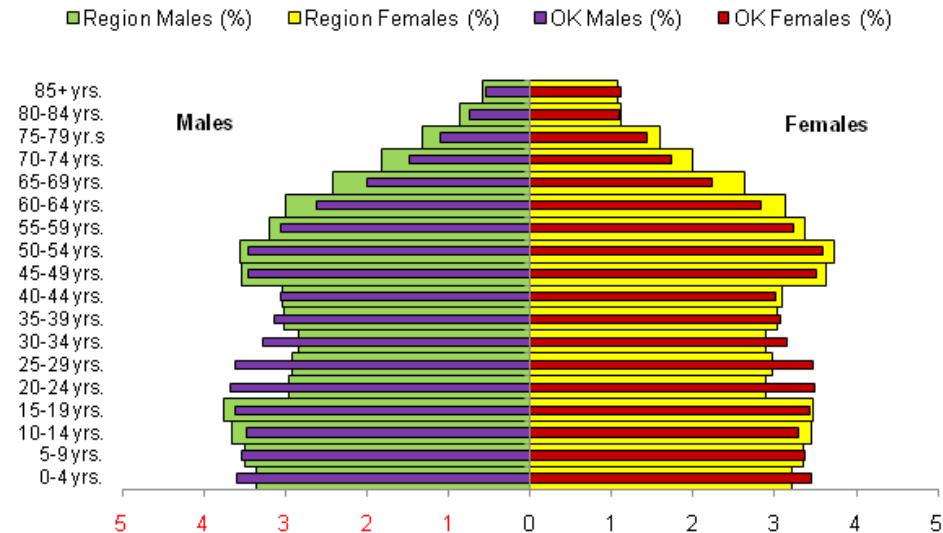

Source: US Census Bureau, 2000 Census and 2010 Census

AGE BY GENDER: 2010

- In 2010, the region's population was typically older when compared to the state as a whole
- The region showed a lower presence among the 20-24, 25-29 and 30-34 age groups

14 County NE & E WIB vs. State of Oklahoma: 2010

Source: U.S. Census Bureau, 2010 Census Demographic Profiles www.factfinder2.census.gov

14 County NE & E WIB Median Age: 2010

Source: U.S. Census Bureau, 2010 Census Demographic Profiles www.factfinder2.census.gov

- Within the 14 county region, 12 counties either matched or surpassed the US median age of 37.2

- For more information on county level population by age group, see Appendix 2

**14 County NE & E WIB: 2000 to 2010
Population Net Growth/Net Decline By Race**

Source: U.S. Census Bureau, 2010 Census Demographic Profiles www.factfinder2.census.gov

- The standard race categories used for Census purposes are white, black, American Indian or Alaska Native (AIAN), Asian, Native Hawaiian or Other Pacific Islander (NHOPI), or some other race

- Hispanic is not considered a race but is instead an ethnicity – it is possible to be white and Hispanic, black and Hispanic, Asian and Hispanic, etc.

- Most of the region’s increase in diversity came from growth among those self described as American Indian or Alaska Native, white or those claiming more than one race

- American Indians remained the largest minority in all of the region’s 14 counties

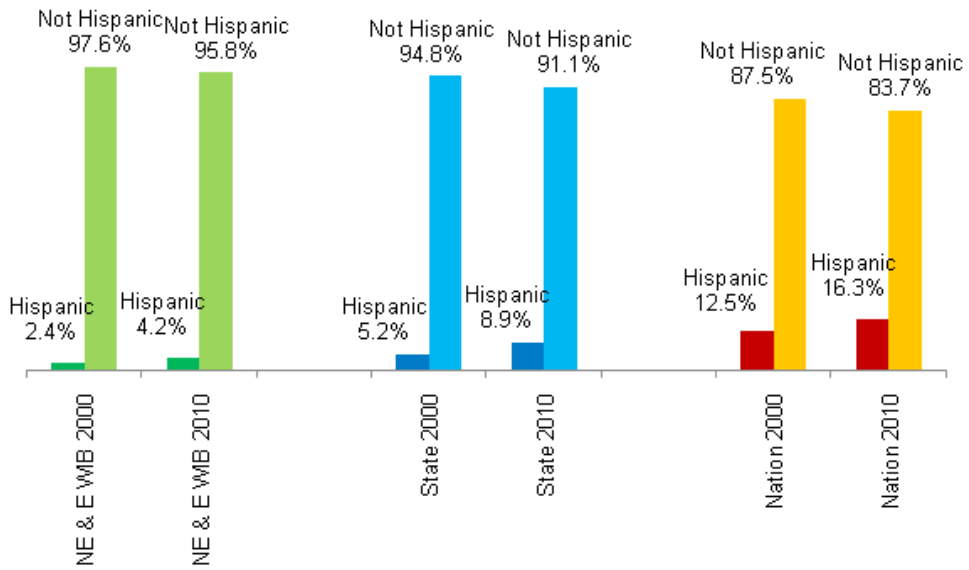

- American Indians represented 18.6% of the region’s total population, well above the state’s average of 8.6%

- The region remains more diverse than the state as a whole
 - Percent self described as something other than white alone in 2010:
 - Region: 32.5%
 - OK: 27.8%
- For more information on county level population by race, see Appendices 3 and 4

HISPANIC ETHNICITY: 2000 AND 2010

- The region's Hispanic population grew, but remained below the state and national percentages
- Muskogee County had the highest number of Hispanics (3,688 or 5.2%)
- Cherokee County had the highest percentage of Hispanics (6.3%, or 2,952)
- Nowata County had the lowest number of Hispanics in the region (240, or 2.3%)
- McIntosh County had the lowest percentage of Hispanics (1.9%, or 390)

**Ethnicity as Percentage of Total Population
2000 Census vs. 2010 Census**

Source: US Census Bureau, 2000 and 2010 Census www.factfinder2.census.gov

**14 County NE & E WIB: 2000 to 2010
Hispanic Population Growth Rate**

Source: US Census Bureau, 2000 and 2010 Census www.factfinder2.census.gov

- While the region had a lower presence of Hispanics by percentage relative to the nation as a whole, it had a higher percentage growth rate than was shown by the US on average

- For more information on county level population by Hispanic ethnicity, see Appendix 5

EDUCATIONAL ATTAINMENT: 2005-2009

- Only Cherokee and Washington counties exceeded the state estimate for the percentage of the population with a bachelor's degree or higher
- US: 27.5% (+/-0.1%)
- State: 22.4% (+/-0.2%)
- Cherokee: 23.6% (+/-1.8%)
- Washington: 25.3% (+/-1.6%)

**Educational Attainment
US, OK and 14 County NE & E WIB**
According To 2005-2009 American Community Survey

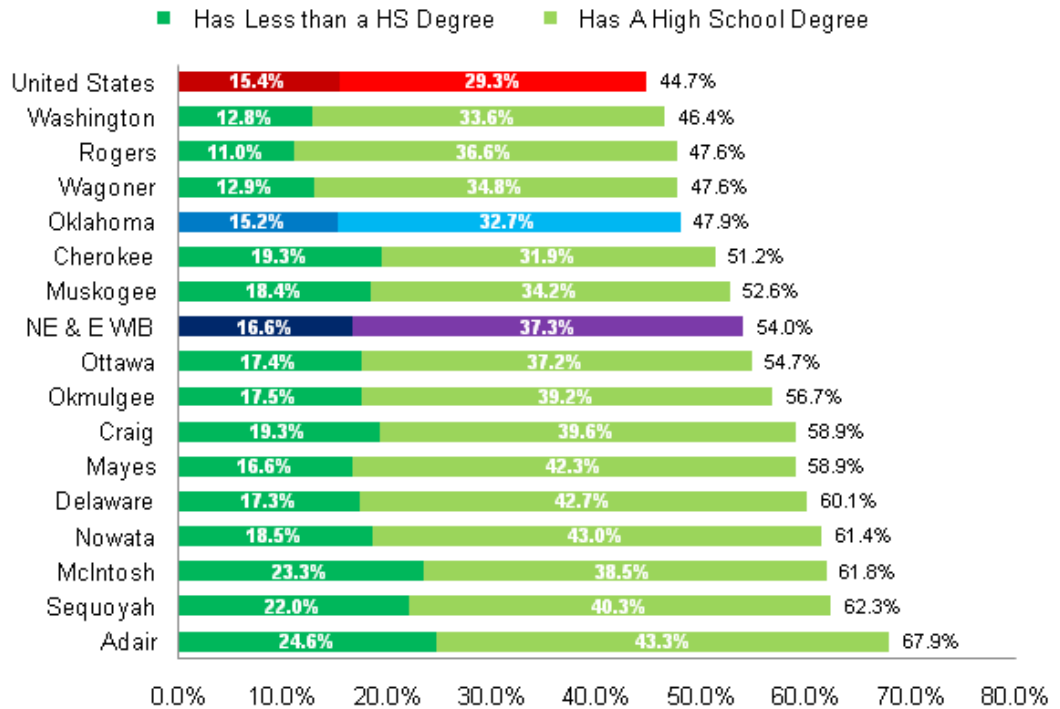

Source: US Census Bureau, 2005-2009 American Community Survey 5 Year Data Set www.factfinder.census.gov

- 9 counties out of 14 exceeded the national estimate for the percentage of the population with some college education but no degree
- US: 20.3% (+/-0.0%)
- Region: 21.8% (+/-0.5%)
- Educational attainment for a large part of the region stopped at a high school degree or less
- The 2005-2009 American Community Survey is based on surveys collected during the full 5 year span and results are considered to be representative of the complete time period
- For more information on county level population by educational attainment, see Appendix 6

Percentage of Population With High School Degree or Less

According To 2005-2009 American Community Survey

Source: US Census Bureau, 2005-2009 American Community Survey 5 Year Data Set www.factfinder.census.gov

PER CAPITA PERSONAL INCOME: 1990 TO 2009

- Per Capita Personal Income (PCPI) for the nation, state and region steadily climbed upward until 2009 when the impact of the global recession caused wages to decline

- 2009 PCPI:
 - US: \$39,635
 - OK: \$35,837
 - Region: \$30,846

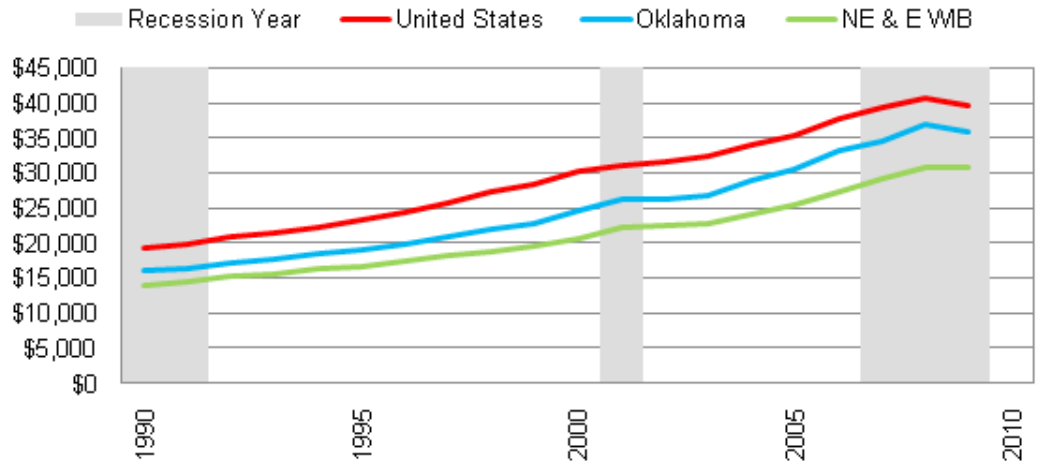

- PCPI figures for all 14 counties have been below state and national figures, but have been generally growing closer since 2000

- Washington County exceeded the state PCPI for the entire time examined

- But Washington County fell below the national PCPI beginning in 1996, not surpassing the national PCPI again until 2009

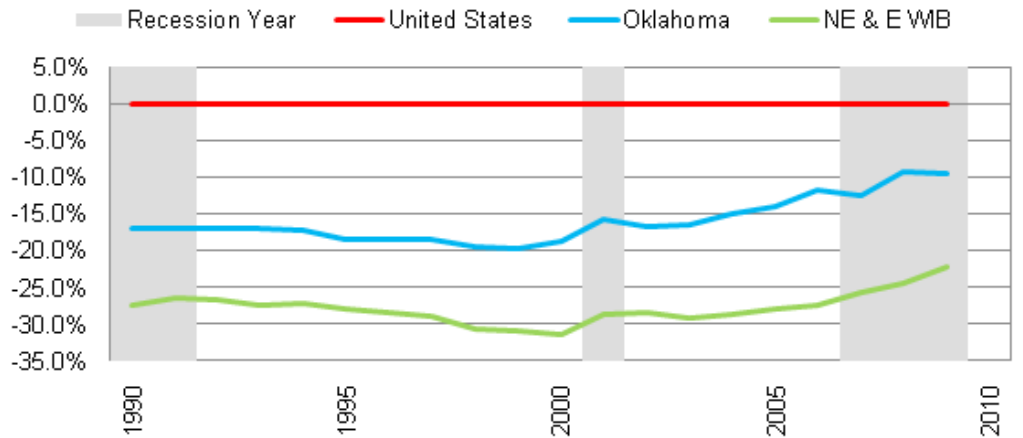

- Rogers County exceeded the state PCPI 8 times since 1990, but has not done so since 2002

Estimated Retail Subject To Sales Taxes For Communities In 14 County NE & E WIB

Source: Estimates Based on Oklahoma Tax Commission Data <http://www.tax.ok.gov/nwsrls.html>

- Retail sales figures used here are based on a summation of calendar month data as reported by the Oklahoma Tax Commission
- Because those data are subject to a reporting time lag, these figures are considered estimates
- Figures represent estimated sales subject to sales tax, thus sales to governments, non-profits, and other non-taxable entities are not included in these figures
- Changes in retail sales could be due to:
 - The introduction or removal of a local sales tax
 - The increase or reduction of an existing sales tax
 - Sharp upswings or downturns in economic conditions
 - The opening or closing of a significant retail establishment like
 - A big-box retailer
 - A large shopping mall
- Collectively, retail sales had been trending upward until 2008, peaking at \$3.7 billion for the region
- As the global recession spread in 2009, collective retail sales for the region dropped to \$3.6 billion
- Retail sales for the region dropped again in 2010, falling to \$3.5 billion
- The largest volume of retail sales occurred in population centers like Muskogee, Bartlesville, Claremore and Tahlequah
 - These four communities accounted for almost half of the region's estimated retail sales volume in 2010
- For more information on local level sales tax collections and growth, see Appendices 8 and 9

INDUSTRY EMPLOYMENT, ESTABLISHMENTS, AND EARNINGS: 2010

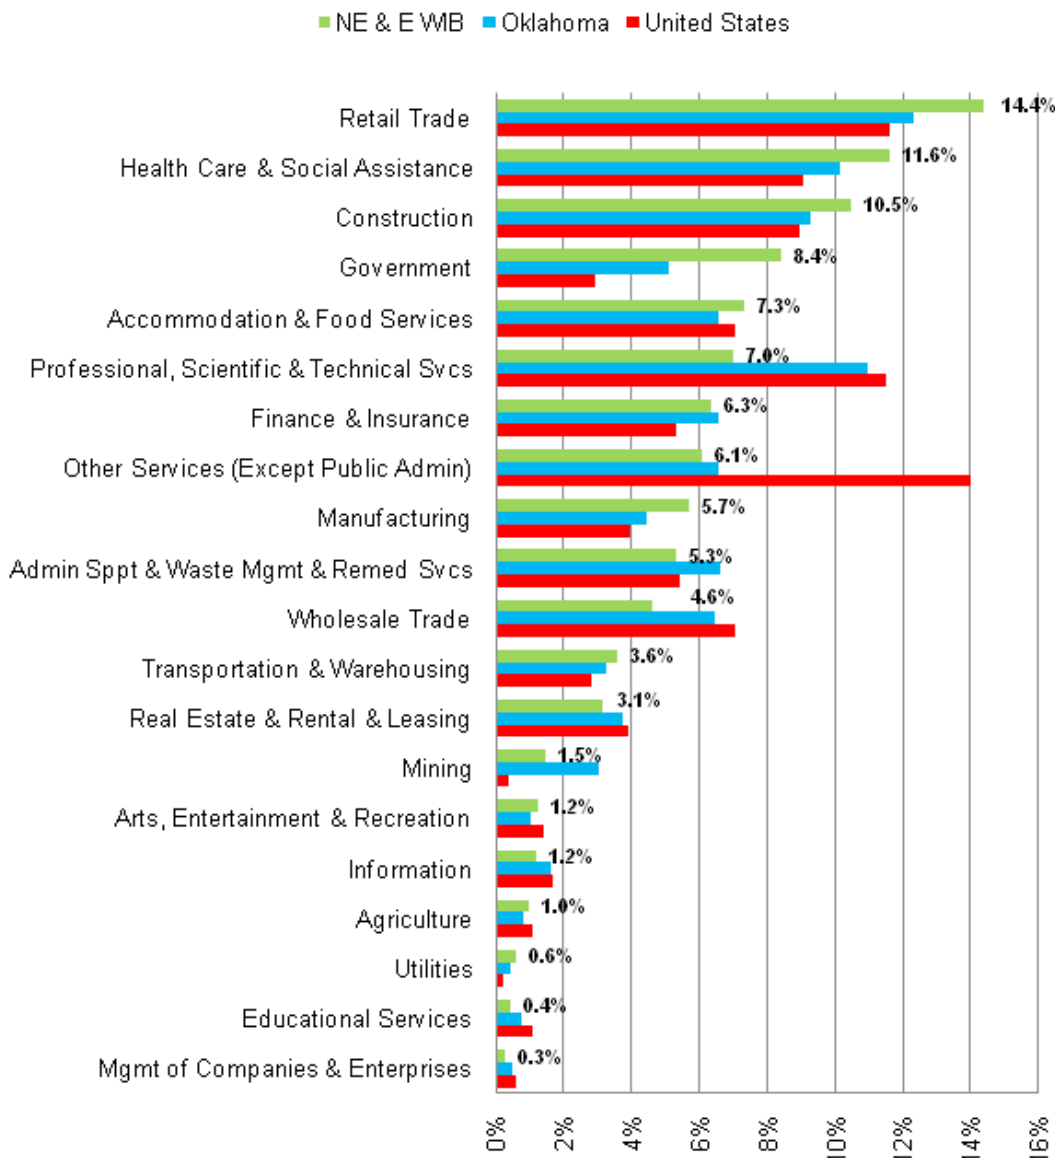

- The following graphs use data from EMSI, which defines industry employment differently from the US Bureau of Labor Statistics (BLS). BLS reports job counts only for establishments with an employer/employee relationship which excludes non-employer establishments like sole proprietorships and partnerships

Industry Establishments: 2010

As Percent of Total

**Includes Employing Establishments,
Partnerships & Sole Proprietorships**

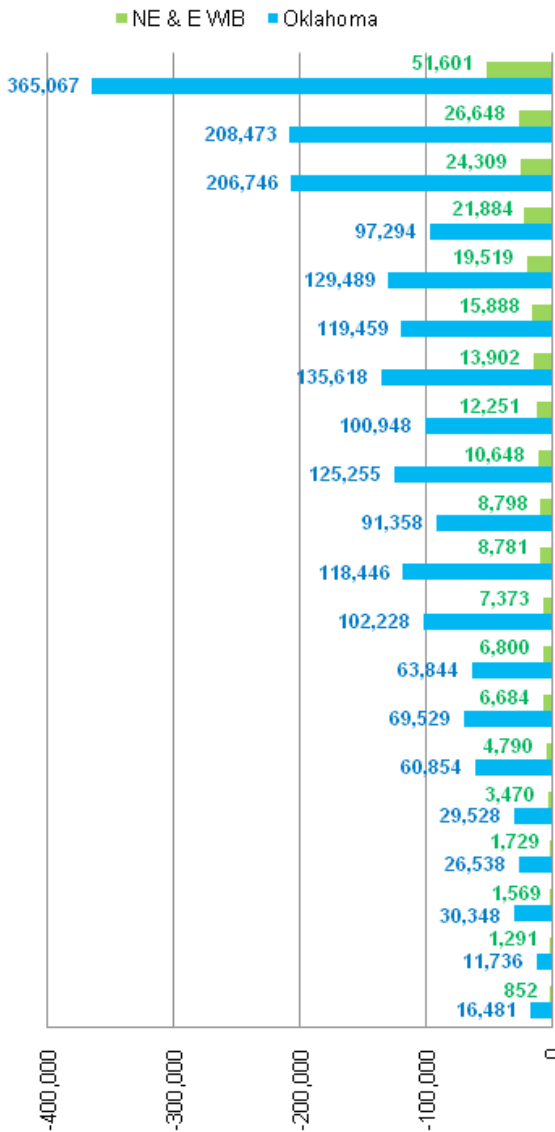

Values Shown On Graph Are Regional Results

Source: EMSI Complete Employment – 3rd Quarter 2011 www.economicmodeling.com

- EMSI includes data from both employer AND non-employer establishments
- The region had 11,517 establishments operating in 2010

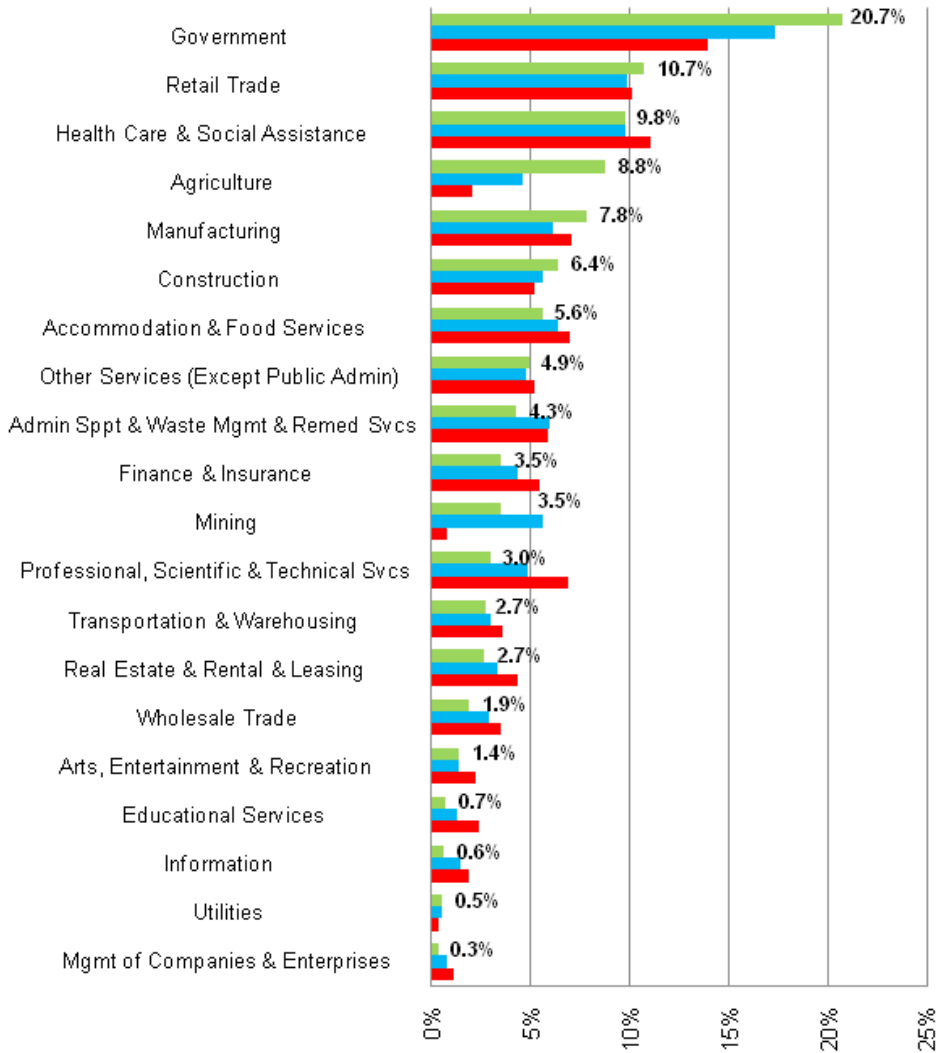

Industry Employment: 2010
Includes Employing Establishments,
Partnerships & Sole Proprietorships

Industry Employment: 2010

Jobs As Percent of Total
Includes Employing Establishments,
Partnerships & Sole Proprietorships

Values Shown On Graph Are Regional Results
■ NE & E WB ■ Oklahoma ■ United States

Source: EMSI Complete Employment – 3rd Quarter 2011 www.economicmodeling.com

- The region had a higher percentage of manufacturing establishments than did the state or nation
- Retail, construction, and health care and social assistance combined to equal one third of all establishments in the region in 2010
- As a percentage, jobs in agriculture, construction, manufacturing, retail trade and government were more prevalent in the region than was the case statewide or nationally

Location Quotient Measures National Competitiveness By Industry

Value Over 1.0 Indicates Competitive Advantage

■ Nation ■ NE & E WB ■ State

Source: EMSI Complete Employment – 3rd Quarter 2011 www.economicmodeling.com

- Industry Location Quotient (LQ) compares the following:
 1. Changes in employment
 2. For a given industry
 3. During a given time period
 4. In a given area, against another reference area

- A score of 1.0 or higher indicates competitive advantage

- The LQ chart compares industries at the 2 digit NAICS level for:
 - Oklahoma and the 14 county region against the nation as a whole
 - Based on 2010 data

- Every county in the region showed a national competitive advantage in agriculture, forestry, fishing and hunting

Additional Competitive Advantage Can Be Found In:											
County	Utilities	Wholesale Trade	Retail Trade	Transportation & Warehousing	Information	Real Estate and Leasing	Management of Companies	Health Care & Social Assistance	Arts, Entertainment & Recreation	Accommodation and Food Services	Other Services
Adair	x										x
Cherokee	x										
Craig	x						x				
Delaware			x								x
Mayes	x		x								
McIntosh			x						x	x	
Muskogee	x		x					x			
Nowata		x		x							
Okmulgee			x								
Ottawa									x		
Rogers	x			x		x					
Sequoyah			x	x				x			
Wagoner			x								x
Washington	x		x								x

Source: EMSI Complete Employment – 3rd Quarter 2011 www.economicmodeling.com

- Nearly every county in the region showed a national competitive advantage in:
 - Mining, quarrying and oil and gas extraction (all but Adair, Cherokee, Delaware and Ottawa)
 - Government (all but Nowata and Washington)

- Most had national competitive advantage in:
 - Manufacturing (Adair, Mayes, Muskogee, Nowata, Okmulgee, Ottawa, Rogers and Wagoner)
 - Construction (Adair, Delaware, McIntosh, Mayes, Muskogee, Nowata, Rogers, Sequoyia and Wagoner)

LABOR FORCE PARTICIPATION RATE: 1990 TO 2010

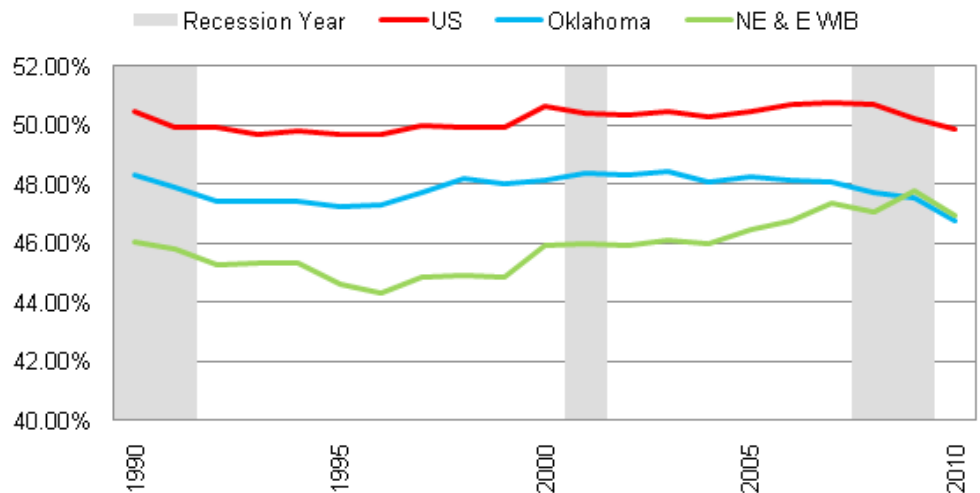

- The labor force participation rate is calculated by dividing the non-farm labor force by the total population

- The measure isn't exact (because total population includes those unable to work due to age, health, or other issues while the labor force count doesn't include farm labor) but inputs are consistent over time, thus the measure indicates trends

- The region's non-farm labor force participation rate had been increasing slowly since 1995, with a minor downturn in 2010

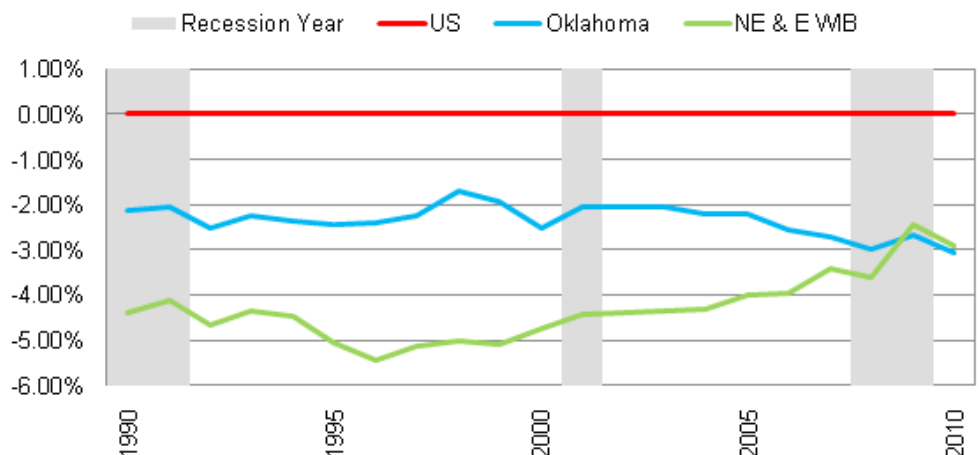

- Three counties showed strong increases in their non-farm labor force participation rates between 2000 and 2010:
 - Cherokee: 9.1% increase
 - Ottawa: 11.3% increase
 - Washington: 8.1% increase

Non-Farm Labor Force Participation Rate

UNEMPLOYMENT RATE: 1990 TO 2010

- Over the last two decades, unemployment rates for the region have typically been near or below the state and national rates

- After the onset of the recent recession, unemployment rates rose sharply

- 2010 annualized unemployment rates:
 - US: 9.6%
 - OK: 7.1%
 - Region: 7.8%

Annualized Unemployment Rate

Source: US Bureau of Labor Statistics www.bls.gov/lau/#tables

- Between 2008 and 2010, Nowata, Okfuskee and Okmulgee had the largest increases in their unemployment rates, with all climbing by more than 5.0 percentage points

- For more information on county level unemployment rates, see Appendix 10

COMMUTING PATTERNS: 2009

- A region is a net worker exporter when the number of residents living in the region who commute out for work exceeds the number of workers who live outside the region but commute into the region for employment

- Census data for 2009 indicates the region had a net outflow of over 58,000 workers

- Wagoner County had the largest net outflow, with a net loss of almost 20,000 workers leaving the county for work

- Almost 60,000 residents commuted out of the NE and E WIB to work in Tulsa County, with almost 16,000 Tulsa County residents commuting into the two WIBS for employment

- Almost 16,000 residents of the region commuted outside the state for employment, including:
 - Workers who commute just over the state line
 - Long haul truck drivers
 - Commercial pilots
 - Petroleum workers
 - Entertainers

- Just over 6,500 out of state residents commuted into the state for employment
