

SITE READY PROGRAM

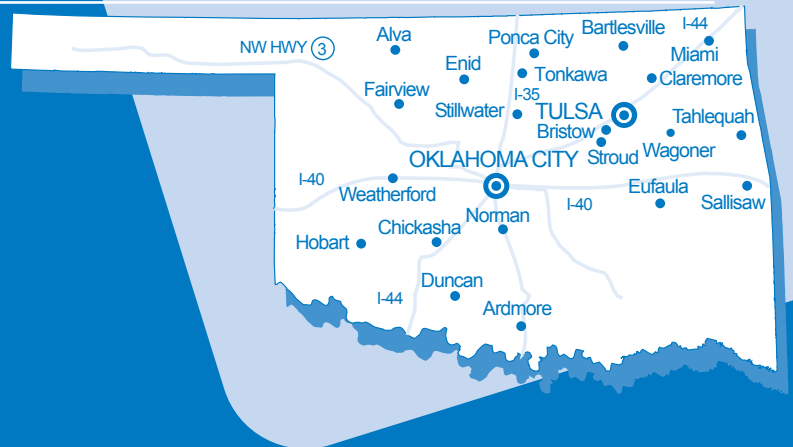

OKLAHOMA
SITE READY
CERTIFICATION PROGRAM

OVERVIEW

Oklahoma's Site Ready certification program makes business relocation, expansion and development in Oklahoma as inviting as possible. A site's successful completion of the Site Ready process guarantees a prospective incoming business that the site is ready for construction.

To become certified as "site-ready," site owners and/or community leaders must complete an application identifying key data about the site to aid site selectors in their searches. An objective third party then assists the Oklahoma Department of Commerce in evaluating the applications to ensure sites meet program requirements.

Once certified, the Oklahoma Department of Commerce (www.OKcommerce.gov/siteready) offers detailed site specific information including proximity to major transportation routes, area labor force statistics, utilities, cost of living details, and business incentives for site selectors' considerations.
