Disaster Damage:

As specified in the June 3, 2014 Federal Register Notice Vol. 79, No. 106, the State sustained multiple disasters occurring from 2011 to 2013. These disasters were far reaching throughout the fifty-seven (57) counties identified under the Presidential Disaster Declarations. Such disasters included; tornadoes, wildfires, flooding, straight-line winds, and winter snowstorms. Disaster related damage resulting from tornadoes (2013) and wildfires (2012) occurring in Cleveland and Creek counties respectively account for the majority of the disaster related damage. A Damage Assessment Report (August 6, 2013) covering the tornado disaster impact area appears as Appendix A in this Action Plan and contains a more detailed assessment of the Moore tornado event of 2013. This single disaster proved to be the most significant event of the Federal Register Notice time period. Since the initial assessment of the storms' impact, inquiries have been made to the State of Oklahoma Department of Emergency Management to update disaster impacts. However, the Department reported that there is no additional State disaster information available. Because several years have passed and vigorous steps have been taken toward recovery, the State determined that a survey was needed to update recovery efforts and determine the unmet needs still existing. As mentioned previously, CDBG_DR funds must be used to cover 'unmet' storm related disaster needs. Given these circumstances, the State prepared both mailed and emailed surveys to representatives of various units of general local governments (counties, cities, towns), HUD assisted housing, and LITHC housing located within the eligible disaster areas. US Census (American Community Survey) data was also examined as well to help better identify targeted groups which could possibly address the LMI requirement set forth in the Federal Register Notice. The following list includes the Presidential Disaster Declarations and eligible counties accounted for under the eligible declaration. The listing also denotes the incident period in which the disaster occurred. Recovery Needs:

A funding allocation was created as a result of several limiting factors and considerations. Some of these factors included Federal Register Notice CDBG-DR guidelines, damage analysis, surveys, US Census data, and of course the Action Plan submission deadline to HUD. Considerations involving public input and especially the amount of available funding also

restricted the overall scope of the program at this time. Unmet need exists in the areas of housing, infrastructure, resiliency / mitigation and planning. Data to determine the unmet need was compiled from unmet need requests provided by an ODOC unmet needs survey conducted from June 26, 2014 through August 8, 2014. Disaster Recovery notification letters were individually mailed to each of the fifty-seven (57) disaster eligible counties across the State. Disaster Recovery notification letters were also mailed to each of the State's eleven (11) Substate Planning Districts. An email database of approximately three-thousand (3,000) from ODOC's Community Developer newsletter was also utilized in conjunction with the ODOC disaster recovery website. Additionally, supplemental data from HUD's Oklahoma City Field Office and FEMA was also used. The unmet needs survey was targeted at the fifty-seven (57) Oklahoma counties and their inclusive municipalities which qualified under the 2011, 2012, and 2013 Presidential Disaster Declarations as specified in the Federal Register Notice. Below is a summary of the results from the survey contained in the ODOC disaster recovery notification letters. Please note that these survey results are the initial response to the inquiry of the State's unmet disaster needs. Because these unmet needs are based off simple requests and not substantiated by an official application, this listing DOES NOT reflect a final eligibility of such requested activities. The FINAL eligibility assessment will be conducted upon evaluation of an officially submitted Disaster Recovery application through the State's OKGrants system. Overall Progress Narrative:

4th Quarter Progress - 2019 4th Qtr. Progress 10/1/2019 thru 12/31/2019:

- ODOC DR Staff continues to enter performance measures as submitted by the sub-recipients, the performance measures are entered into the latest round for that activity in the QPR as per associated activities.
- ODOC DR Staff and HUD DR staff continue to work on the Action Plan and Performance Modules in DRGR addressing areas of concern for updates and revisions.

There are two discrepancies (1) noted in the prior QPR and corrected in the current QPR in Project 10B Ext. Activity for OKC 00005 10.6 Infra (Drainage) R10Ext. -22,350 was incorrectly reported as an expenditure as it was actually a voucher revision. There have been no funds drawn against this activity and remains budgeted & obligated at \$298,000.22. (2) Project 11B - OKC 00005 10.6 Housing (Single-Fam) R11: This activity is budgeted and expended at \$70,782.07 -There is a discrepancy in the system that is reflecting the drawn amount at \$131,969.96 for this activity (see Voucher 389105).

Nine contracts remain open between two sub-recipients, City of Norman (4), and City of Oklahoma City (5) but should be completed and closed during the current quarter - see below:

OKC 00005 for \$8,721,398.70 contains 5 separate contracts created during multiple round funding:

Activity Description:

- See DRGR Supporting Documentation (Upload Docs)
 108th Avenue NE from Rock Creek Road to Franklin Road [\$220,000]
 Two (2) miles of paving with base repairs to severely failed areas

168th Avenue NE from Rock Creek Road to Indian Hills Road [\$330,000]
 Three (3) miles of paving with base repairs to severely failed areas

The project for both roads will include the following:

- Base repair to areas of the asphalt that have failed
- Asphalt paving of the surface and intersection radius returns
- Paving driveway and private street locations from the edge of pavement to the edge of the city rights-of-way line
- Grading of shoulders and minor drainage repairs
- Placing sod to restore the vegetation and control erosion
- Center and edge line striping on the 108th Avenue NE project

The asphalt on the typical rural road that is 22 feet wide (like 108th and 168th) will require 1775 tons of asphalt to place a 2.5 inch paving lift. That equates to \$98,000 per mile. The balance of the funding covers the base repairs, shoulder/drainage work, asphalt drives and intersections, shoulder restoration, sod and striping.

Location Description:

Cleveland County - See DRGR Supporting Documentation (Upload Docs)

Activity Description:

- See DRGR Supporting Documentation (Upload Docs)

1. The damage and loss of critical facilities represented by the record-breaking (DR-1985) 2011 Severe Winter Storm and Snowstorm had a significant and dramatic effect on the City of Catoosa. The storm began with a mix of freezing rain and sleet and 20+ inches of accumulated snow was received in the Catoosa area. Winds of over 35 miles per hour were also recorded. Moisture problems created by the storm and the freeze/thaw cycle that accompanied it have led to a significant increase in "unmet need" that has not yet been adequately addressed. The Spunky Creek Drainage Channel received significant tree damage which has led to the accumulation of debris and silt in the channel itself. Restrictions in funding caused by limited local financial resources has led to continued deferment of these, suddenly critical, capital projects which cannot otherwise be leveraged with state and federal resources. This significantly delays the City's recovery effort following major disasters. The City has developed a multi-phased drainage and street resurfacing program to deal with the "unmet needs" in this area of the City.

The City of Catoosa has an existing neighborhood area, known as the Rolling Hills Addition which is adversely affected by the deteriorated Spunky Creek drainage area. This subdivision is an eligible CDBG target area documented by a project specific income survey completed within the past two months.

The City proposes to continue a drainage improvement program for the CDBG Targeted Area (south of Admiral Blvd.) to clear and improve the Spunky Creek Tributary drainage channel that was affected by the Severe Winter Storm and Snowstorm (DR-1985). The City, working with Wagoner County, has completed the needed arterial street resurfacing in the area. The City of Catoosa has started a phased approach to clear and reconstruct an adjacent portion of the Spunky Creek drainage channel utilizing City and CDBG resources but an additional phase is needed to support the proposed channel clearance and new construction work. The City intends to complete the channel improvements by clearing and constructing approximately 500 linear feet of the existing drainage channel at an estimated cost of \$200,000. The City has prepared an Engineering Report and Cost Estimate which is attached to this Disaster Recovery CDBG application.

The wildfires of August 3-14, 2012, and the subsequent recovery efforts proved to be detrimental to many of the rural roads located in Cleveland County. The wildfire encompassed areas under the jurisdiction of both the City of Norman and Cleveland County. Although the overall consideration of projects was completed jointly by the City of Norman and Cleveland County, each entity was responsible for evaluation, prioritizing, preparing and submitting individual applications. Most of the rural roads in the wildfire damage area were originally constructed to a light standard of a chip seal or thin asphalt overlay on top of an existing unstabilized aggregate road. The high volume of large heavy equipment used in the recovery efforts resulted in numerous failures to the rural road network in the wildfire disaster area. As various road failures have manifested themselves the damaged areas, they have been addressed on a spot basis. It is now over two years after the disaster event and widespread failures are in need of addressing with permanent solutions. These roadway failures have overburdened both the City's and the County's budget capabilities to make permanent repairs and bring the entire road surfaces back to pre-disaster conditions and to provide a safe transportation network for the impacted rural citizens. During the wildfire, 108th Avenue SE (City of Norman jurisdiction), 120th Avenue SE (City of Norman jurisdiction) and 180th Avenue SE were designated as major haul roads. Other Section Line Roads utilized as haul roads were Cedar Lane, Post Oak Road, Maguire Road, and Etowah Road. The haul roads were heavily traveled with fire trucks, power line trucks and equipment with a GVW from 12,000 pounds to 90,000 pounds. The existing road prior to the disaster event was sufficient for periodic large truck traffic such as sanitation and utility line trucks, but not the weight and volume of the traffic that was encountered during the disaster event and subsequent recovery efforts. The key issue that has led to the deterioration of these roads is that none of these

roadways were designed to carry the volume or the weight of the vehicles that repeatedly traveled each roadway during the time of the wildfire disaster and the subsequent recovery efforts.

The City of Norman and Cleveland County Road Maintenance staff along with the engineering staff from the City of Norman and EST, Inc. has thoroughly analyzed these roadways. Clearly, each roadway received damage as a result of the wildfire disaster and subsequent recovery efforts. Although some roads had minor repairs after the disaster, it is the determination that these roadways are now beginning to show widespread serious signs of deterioration that is directly attributable to the disaster and recovery efforts. Repairs to these existing roadways are essential as stated previously to provide a safe transportation network for the impacted rural citizens.

Loss of electrical power to the facility occurred during DR-4109 and DR-1989 resulting in 4600 users without potable water. In addition, power outages generally occur during any type of moderate to severe weather. At present, the service provider has no plans to upgrade the electric infrastructure resulting in an ongoing need that remains unmet from DR-4109 and DR-1989. Power lines in the newly-selected site adjacent to U.S. Highway 81 are more durable distribution lines as compared to the lesser maintained and less resistant system at the present unpopulated site. In addition, no backup power source exists at the present site in the event of electrical outages. Although not an eligible CDBG-DR grant cost by itself, the new plant will include a backup power source in the event of power outages.

The plant has suffered damage to components from voltage irregularities due to outages and surges, such as occurred during DR-4109 and DR-1989. A surge protector was installed on the main breaker to minimize additional damages. However, without power, the plant could not cycle and pre-treat water to move it to the treatment plant in town. The longer the outage occurs, the greater the increase in the chances that service will be disrupted.

During severe weather recovery, such as DR-4109 and DR-1989, the priority to repair the service lines to the plant by the City's single electric crew must be balanced with the restoration of circuits and outages impacting neighborhoods and other areas.

Following outages, as occurred in DR-4109 and DR-1989, City electric crews removed tree limbs and branches from the line to make repairs and restore services after all other priority lines were repaired and services restored elsewhere.

The loss of power is in the electrical distribution system and power lines which are repairable. The cost for a full

upgrade to new electric infrastructure is not cost-effective for a facility located in a floodplain and threatened with increased ground water lakes from sand mining in the immediate vicinity of the plant. The option to relocate the plant to the proposed location site is on a heavier duty distribution system maintained by Cimarron Electric Cooperative with better resources to maintain sustained distribution. The City has only one electric crew to restore outages to the current facility and outages due not become a priority until treated water storage tanks run low of water and loss of water to residences and businesses are threatened.

This resiliency project would mitigate future electrical outages and flood damage, which would completely incapacitate the water distribution system to 4600 customers, residential, commercial,
