

# Oklahoma's Centers for Workforce Excellence

*Where industry drives decisions*

➤ Oklahoma's Centers for Workforce Excellence are a key component of Oklahoma Works Together, a statewide, collaborative initiative that works locally to deliver the skilled team Oklahoma businesses need to operate. Located throughout the state, each Center for Workforce Excellence has a targeted focus to best support the key industry sectors in the region.

*"A 'Center for Workforce Excellence' is considered a one-stop-shop, but it definitely is not a one-size-fits-all for employers. These specialized teams customize a workforce training and recruitment plan based on the labor needs of an employer and its geographical setting."*

— Brent Kisling, Executive Director, Oklahoma Department of Commerce

## OKLAHOMA COMPANIES

Grow your workforce and set the course for a more successful business model. Your local Center for Workforce Excellence can be an extension of your workforce development and new employee recruitment, providing support that is unique to your business. They will work alongside you to understand your workforce needs, create custom training solutions and deliver skilled, trained employees. This collaborative approach brings our best resources to the table to help your business succeed today and into the future.

## EXPAND IN OKLAHOMA

The Oklahoma Department of Commerce and local economic development organizations work closely with site selection consultants or company executives to ensure company leadership can make an informed decision when finalizing a location to expand or relocate.

We want to make every business a success in Oklahoma and that starts with us understanding your workforce needs and aligning your recruitment and training efforts with the right resources in our state.

**CWEs are located throughout the state and specialize in industries such as:**

Aerospace

Cybersecurity

Healthcare

Manufacturing
