

Attachment 1 – Approved Measure Lifespans for OK WAP

Oklahoma Weatherization Assistance Program
Approved Maximum Lifetimes of Weatherization Measures
As per Attachment 9 of WPN 19-4

NEAT Measures Considered

Oklahoma Weatherization Assistance Program requires all sub-grantees to enable for evaluation the Measures listed below on the NEAT audit tool with the DOE-approved Life Expectancy in the audit:

<u>Measures Considered</u>	<u>Life Expectancy</u>
Attic Insulation R-11	25 Years
Attic Insulation R-19	25 Years
Attic Insulation R-30	25 Years
Attic Insulation R-38	25 Years
Attic Insulation R-49	25 Years
Fill Ceiling Cavity	25 Years
Wall Insulation	25 Years
Kneewall Insulation (airtight cavity)	25 Years
Replace Heating System (Fossil Fuel Systems Only)	20 Years
High Efficiency Fossil Fuel Furnace	20 Years

MHEA Measures Considered

Oklahoma Weatherization Assistance Program requires all sub-grantees to enable for evaluation the Measures listed below on the MHEA audit tool with the DOE-approved Life Expectancy in the audit:

<u>Measures Considered</u>	<u>Life Expectancy</u>
Wall Fiberglass Batt Insulation	25 Years
Wall Fiberglass Batt Insulation in Addition	25 Years
Wall Cellulose Loose Insulation	25 Years
Wall Cellulose Loose Insulation in Addition	25 Years
Wall Fiberglass Loose Insulation	25 Years
Wall Fiberglass Loose Insulation in Addition	25 Years
Roof Cellulose Loose Insulation	25 Years
Roof Cellulose Loose Insulation in Addition	25 Years
Roof Fiberglass Loose Insulation	25 Years
Roof Fiberglass Loose Insulation in Addition	25 Years
Replace Heating System (Fossil Fuel Furnaces Only)	20 Years
